

DOING THE MOST GOOD<sup>SM</sup>

# Work-Tech Career Training

## Start A New Career In Telecommunications

The Work-Tech program is designed to train students about the different areas of cable networking and fiber optics. Students will also receive certification after they have completed the course. This is a “**hands on**” course and because the class sizes will be kept small, students will receive more individualized attention and assistance from instructors. Other courses such as “**Life Skills**” will also be taught. Having a better understanding of personal finance, customer service, critical thinking, and good communication skills are some of the topics covered in the “**Life Skills**” course.

### Hey, What’s Your Career Path???

#### Why enter into the Telecommunications Field?

Because it is a BOOMING industry that continues to grow and gain more business and popularity. Work-Tech training is part tech and computers, along with learning the electrical part of cable networking.

Entry-level jobs in Telecommunications can start out paying as much as \$15-\$20 an hour.
